Summary

Full Stack Java Developer specializing in Java 21, Spring Boot, and React, with hands-on experience building and deploying production-style applications. Built HireIQ, an AI-powered career platform integrating Spring AI and the Claude API. Skilled in RESTful API design, OAuth 2.0/JWT stateless authentication, Redis caching (Cache-Aside), Docker Compose containerization, and CI/CD pipelines with GitHub Actions. B.Tech CSE student at NIT Srinagar (2028), passionate about writing clean, scalable backend systems and shipping end-to-end features.

Education

National Institute of Technology, Srinagar — Srinagar, J&K
B.Tech – Computer Science & Engineering | CGPA: 7.46 / 10.0 — *Aug 2024 – May 2028 (Expected)*

Technical Skills

Languages: Java 21/17 (HackerRank 5-Star Gold Badge), C++, SQL, JavaScript (ES6+), HTML5, CSS3, Bash/Shell Scripting
Backend & Caching: Spring Boot 3.x, Spring AI, Spring Security, Hibernate ORM, Spring Data JPA, Redis (Cache-Aside, TTLs), JDBC, REST APIs
Agentic AI & LLMs: Spring AI, Multi-Agent Workflows, Prompt Engineering, Structured JSON Outputs, Claude API Integration
Security & Auth: OAuth 2.0 (Google & GitHub Multi-Provider), JWT (Stateless Bearer Tokens), BCrypt Hashing, RBAC, DaoAuthenticationProvider
DevOps & Cloud: Docker, Docker Compose, GitHub Actions CI/CD (Automated Builds, Test Suites, EC2 Deploy), Git, Maven, Linux Automation
Frontend & Design: React 19, Vite, Axios, Design Systems & Tokens, Glassmorphism UI, Responsive Web Design
Testing & Architecture: JUnit 5, Mockito, Integration Testing, Clean 4-Layer MVC, DAO, Factory, Singleton, Builder & DTO Patterns

Projects

HireIQ – AI-Powered Job Assistant | **[Live Demo]** · **[GitHub]** — May 2026 – Aug 2026
Spring Boot 3.3, React 19, MySQL, Spring Security, JWT, Docker
- Architected a full-stack AI career platform featuring personalized job assessment, resume diagnosis, recruiter matching, and impact-driven bullet optimization using Claude 3.5 Sonnet.
- Secured REST APIs with Spring Security 6, stateless JWT authentication, and Google OAuth 2.0; eliminated sensitive-field leakage via a global `@ControllerAdvice` handler and strict DTO validation.
- Containerized the multi-service stack with Docker Compose (Spring Boot backend, React 19 SPA, MySQL 8.0), enabling deterministic one-command local and production deployments.

Spring Boot Redis Distributed Cache Layer | **[GitHub]** — Sep 2026
Spring Boot, Redis, Spring Data Redis, MySQL, JPA
- Engineered a high-throughput caching layer using the Cache-Aside pattern with Redis and MySQL, cutting database read load by 85% and reducing average response times from 180ms to under 15ms for frequent queries.
- Prevented cache staleness and data inconsistency by configuring granular TTL policies and transactional cache eviction hooks on mutation events.

Student Login Portal – 4-Layer Identity Platform | **[GitHub]** — Jan 2025 – Apr 2025
Spring Boot, Spring Security, JWT, BCrypt, MySQL
- Designed a 4-layer clean architecture backend (Controller/Service/Repository/DTO) with strict MVC separation, blocking 100% of unauthorized access across 6 endpoints via a custom stateless Spring Security filter chain and BCrypt hashing.
- Led a feature-branch Git workflow across a 2-person team, integrating an external Python analytical microservice via versioned REST contracts across 40+ commits.

Automated CI/CD Pipeline & Deployment | **[GitHub]** — Sep 2026
GitHub Actions, Docker, AWS EC2, Maven
- Automated build, test, and release cycles via GitHub Actions, executing automated Maven test suites, multi-stage Docker image builds, and automated SSH-based deployment to AWS EC2 on every push to main.

Achievements & Recognitions

- **HackerRank Java 5-Star Gold Badge** — 2025
- **Razorpay AI BuildAthon 2026 Contender** | *HireIQ System Architect* — Aug 2026
